Summary

Final-year CS student who ships and runs production systems, not just class projects: a MERN platform live with 3,000+ real student records, a Docker-sandboxed online compiler serving 30–40+ daily active developers, and an AI due-diligence tool built on a multi-agent FastAPI pipeline. MongoDB Certified Developer with a DSA foundation (200+ LeetCode, 1,500+ CodeChef) and hands-on experience across the full deployment stack – Docker, NGINX, CI/CD, and cloud hosting.

Education

Aditya University

B.Tech in Computer Science and Engineering, Kakinada, Andhra Pradesh

Expected May 2027

CGPA: 8/10

Sasi New Gen Junior College

MPC (Mathematics, Physics, Chemistry)

Jun 2021 – May 2023

97.7%

Experience

Software Development Intern – Technical Hub Pvt. Ltd., Surampalem, AP May 2025 – May 2026 (Part-time)

- Shipped full-stack MERN modules for a live campus ecosystem platform, working in an Agile team with Git feature-branch workflows, code reviews, and sprint planning.
- Eliminated N+1 query patterns on high-traffic routes by redesigning MongoDB aggregation pipelines and refactoring REST endpoints, measurably reducing average response time.
- Delivered real-time notification and analytics dashboards via WebSockets, replacing manual refreshes so organizers could track event registrations and system metrics live.

Projects

AU-BloodConnect – Blood Donation Management System

[Live](#) — [GitHub](#)

- Tracked 3,000+ student donor records live for college use by leading a 7-person team building a full-stack MERN platform with RBAC-protected admin/volunteer review.
- Powered real-time donation-count updates on approval via Socket.IO, with AWS S3 handling fast-loading donor and donation photos at scale.

BPR Compiler – Multi-Language Online Compiler

[Live](#) — [GitHub](#)

- Serving 30–40+ active developers daily, built a cloud-hosted browser IDE for Java, C++, C, Python, and JavaScript with an integrated AI assistant that auto-detects and fixes code errors.
- Secured multi-language code execution via Docker-sandboxed isolation on AWS EC2 behind an NGINX reverse proxy, with automated GitHub Actions CI/CD and Let's Encrypt SSL.

Lemma ZK Tracer – AI Due Diligence Verification Platform

[Live](#) — [GitHub](#)

- Enabled traceable AI-verified financial analysis by building extraction, screening, and orchestrator agents in a FastAPI multi-agent framework parsing large financial documents.
- Ensured every generated metric traced back to its source passage using Lemma SDK vector search combined with SHA-256 validation, coordinating delivery across a 3-person team.

GBR Schools – Institutional Website

[Live](#)

- Delivered a 10+ page Next.js/TypeScript site for a K-10 institution as a freelance engagement – admissions, academics, events, and a parent portal – with a Cloudinary media pipeline and CI-driven deployment.

Voice Alarm Negotiator

[Live](#) — [GitHub](#)

- Built a cross-platform React Native SaaS app that drives task accountability using a conversational Generative AI (Gemini) voice negotiator, Stripe billing, and a premium productivity dashboard.

Skills

Frameworks: React.js, Next.js, Node.js, Express.js, React Native, FastAPI, Streamlit, Vite

Languages: JavaScript, TypeScript, Python, Java, SQL, C, C++, HTML, CSS

Cloud & Databases: AWS (EC2, S3), MongoDB (Certified), MySQL

DevOps: Docker, NGINX, GitHub Actions, CI/CD pipelines, Linux

Core Concepts: REST APIs, JWT Authentication, OAuth, WebSockets, System Design, OOP, Data Structures & Algorithms

Certifications

- MongoDB Associate Developer – MongoDB, 2026
- GitHub Foundations – Microsoft Learn, 2026
- Java Certified Foundations Associate – Oracle University, 2025
- IT Specialist: HTML & CSS – Certipoint, 2024
- HCI Design & Implementation – NPTEL, IIT Guwahati
- JavaScript Essentials 2 – Cisco Networking Academy
- Python Essentials 1 – Cisco Networking Academy

Achievements

Solved 200+ problems on LeetCode and 1,500+ on CodeChef, building a strong foundation in Data Structures and Algorithms.
