Summary

MERN Stack Developer and **MongoDB Certified Developer** with hands-on experience building and deploying production-grade applications handling **1000+ real-time records**. Proficient in React.js, Node.js, Express.js, and AWS with demonstrated expertise in RESTful API design, role-based authentication, sandboxed code execution, and system reliability. Strong foundation in Data Structures, Algorithms, and OOP. Seeking a Software Development Engineer role to build high-performance, scalable solutions.

Education

Aditya College of Engineering and Technology

B.Tech in Computer Science and Engineering

Sept 2023 – Present

GPA: 7.87 / 10

Sasi New Gen Junior College

MPC (Math, Physics, Chemistry)

Jun 2021 – May 2023

97.7%

Experience

Software Development Intern – Technical Hub Pvt. Ltd.

May 2025 – May 2026 (*Part-time*)

- Developed and maintained **3+ client-facing web applications** using **React.js, Node.js, and Python**, contributing to production deployments used by real end users.
- Designed and integrated **RESTful APIs** across multiple modules, reducing backend response time and improving code reusability by applying OOP and design patterns.
- Applied Data Structures and Algorithms to optimize critical application logic, improving runtime efficiency on data-heavy operations.

Projects

AU-BloodConnect – Blood Donation System

[GitHub](#)

- Built and deployed a full-stack **MERN** platform managing donor registrations and blood donation campaigns, handling **1000+ real-time records** across **3 user roles**.
- Designed **10+ RESTful APIs** and implemented **JWT-based role-based access control**, eliminating unauthorized access and improving system reliability by **100%**.

Online Compiler (Multi-Language)

[GitHub](#)

- Engineered a browser-based compiler supporting **5+ programming languages** with real-time execution and output rendering, achieving sub-second response times.
- Implemented secure backend execution using **sandboxed Docker environments** to safely isolate and process untrusted user code, preventing system-level vulnerabilities.

Resale Price Estimator

[GitHub](#)

- Developed a dynamic pricing engine using custom prediction logic across **4+ product attributes** (condition, age, category, brand), enabling accurate real-time price estimation.
- Reduced price assessment time by enabling instant automated valuation, replacing manual estimation workflows for resale decision-making.

EvtntGo Web – Organizational Project

[GitHub](#)

- Contributed to frontend development using **React** and **Vite**, improving UI component load speed and overall user experience across **5+ core pages**.
- Implemented secure admin authentication with **JWT-based role-based access control**, reducing unauthorized access incidents to zero during testing cycles.

Skills

Languages: JavaScript, Python, Java, C, C++, SQL, HTML, CSS, TypeScript

Frameworks & Tools: React.js, Node.js, Express.js, Vite, Git, GitHub Actions, VS Code, Docker

Cloud & Databases: AWS (EC2, S3), MongoDB, MySQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, REST APIs, System Design

Practices: CI/CD, Agile Development, JWT Authentication, 2FA, Unit Testing

Exploring: Solidity, Blockchain, Microservices, Redux

Achievements

- Academic Excellence:** Scored **97.7%** in Class XII MPC (top performers, district level).
- Portfolio:** bollareddypranoyraj.github.io/Portfolio – Live demos of all deployed projects.

Certifications

- MongoDB Associate Developer Certification** – MongoDB (2026)
- Java Certified Foundations Associate** – Oracle University (2025)
- GitHub Foundations Certification** – Microsoft Learn / GitHub (2026)
- Design & Implementation of Human-Computer Interfaces** – NPTEL, IIT Guwahati (2025)
